

Air Source Heat Pump Rebate

Save up to \$250

The 2012 air source heat pump rebate program focuses on key areas of the installation process to help ensure our customers get the maximum benefit from their new air source heat pump.

- Proper sizing
- Airflow and refrigerant charge
- Duct sealing (exposed ducts only)

Qualifying systems must be ENERGY STAR rated or listed on the Air Conditioning, Heating and Refrigeration Institute (AHRI) directory.

Rebate summary

- Air source heat pump must be installed within the Connexus Energy electrical service area.
- Limit one rebate per customer account.
- Installing contractor must be registered through HVACReduction.net or natex.org.
- Only registered contractors have rebate applications. Complete rebate details are on the back of the application form.

Unit Size	Rebate
SEER 14.5	\$150
SEER 15	\$200
SEER 16+	\$250
