

# Wellspring® Wind Energy

Become a Wind Supporter

While the electricity that is delivered to your home includes approximately four percent renewable energy, our Wellspring Renewable Wind Energy Program allows energy-conscious customers the option of helping us do even more for the environment.

By making the choice to become a wind supporter, you not only help support wind energy development in Minnesota, but also help reduce our dependency on non-renewable energy sources, like coal and other fossil fuels.

## Doing our part

As the demand for electricity continues to grow, our power supplier, Great River Energy, is on track to meet the green energy objective passed into law requiring utilities to generate 25 percent of their power from renewable sources such as wind, water, and sun by 2025. The law encourages the use of wind farms, hydroelectric power, and solar energy, as well as cleaner burning fuels.

Our commitment to environmental leadership is part of our strategic initiatives, and we are convinced that pursuing renewable energy alternatives and giving customers the choice to support those initiatives is the right thing to do.

Choosing to participate in the wind energy program will not affect normal power delivery. The electricity you use will continue to come from the regional electrical grid.

### Be a Wind Supporter

You choose the level at which you want to join.  
(.61 cents per 100 kWh block)

\$3 per month (approximately 5 kWh blocks)	Wind Contributor
\$6 per month (approximately 10 kWh blocks)	Wind Friend
\$9 per month (approximately 15 kWh blocks)	Wind Champion
Anything over \$9 per month	Wind Visionary
You tell us how much you'd like to contribute	Wind Choice

*\*A 12-month commitment is required. An average home uses a total of 800 - 1,000 kilowatt hours of electricity per month. Becoming a Wind Friend is equivalent to an average home's monthly electric use.*
